Key Performance Indicators

We measure the success of our strategy using a number of key performance indicators that are defined and discussed in our 2019 Annual MD&A and our Second Quarter 2020 MD&A. We believe these key performance indicators allow us to appropriately measure our performance against our operating strategy as well as against the results of our peers and competitors. The following key performance indicators are not measurements in accordance with IFRS and should not be considered as an alternative to net income or any other measure of performance under IFRS. They include:

- subscriber counts;
- Wireless;
- Cable; and
- homes passed (Cable);
- Wireless subscriber churn (churn);
- Wireless blended average billings per user (ABPU);
- Wireless blended average revenue per user (ARPU);
- Cable average revenue per account (ARPA);
- Cable customer relationships;
- Cable market penetration (penetration);
- capital intensity; and
- total service revenue.

Non-GAAP Measures and Related Performance Measures

We use the following non-GAAP measures and related performance measures. These are reviewed regularly by management and the Board in assessing our performance and making decisions regarding the ongoing operations of our business and its ability to generate cash flows. Some or all of these measures may also be used by investors, lending institutions, and credit rating agencies as indicators of our operating performance, of our ability to incur and service debt, and as measurements to value companies in the telecommunications sector. These are not recognized measures under GAAP and do not have standard meanings under IFRS, so may not be reliable ways to compare us to other companies.

Non-GAAP measure or related performance measure	Why we use it	How we calculate it	Most comparable IFRS financial measure
Adjusted EBITDA Adjusted EBITDA margin	 making decisions about the ongoing operations of the business and our ability to generate cash flows. We believe that certain investors and analysts use adjus EBITDA to measure our ability to service debt and to me other payment obligations. We also use it as one component in determining short-te incentive compensation for all management employees. 	Net income add (deduct) income tax expense (recovery); finance costs; depreciation and amortization; other expense (income); restructuring, acquisition and other; and loss (gain) on disposition of property, plant and equipment. Adjusted EBITDA margin: Adjusted EBITDA divided by revenue.	Net income
Adjusted net income Adjusted basic and diluted earnings per share	 To assess the performance of our businesses before the effects of the noted items, because they affect the comparability of our financial results and could potentiall distort the analysis of trends in business performance. Excluding these items does not imply that they are non- recurring. 	Adjusted net income: Net income add (deduct) restructuring, acquisition and other; loss (recovery) on sale or wind down of investments; loss (gain) on disposition of property, plant and equipment; (gain) on acquisitions; loss on non-controlling interest purchase obligations; loss on repayment of long-term debt; loss on bond forward derivatives; and income tax adjustments on these items, including adjustments as a result of legislative changes. Adjusted basic and diluted earnings per share: Adjusted basic and diluted earnings per share: Adjusted net income and adjusted net income including the dilutive effect of stock- based compensation divided by basic and diluted weighted average shares outstanding.	Net income Basic and diluted earnings per share
Free cash flow	 To show how much cash we have available to repay deb and reinvest in our company, which is an important indic of our financial strength and performance. We believe that some investors and analysts use free ca flow to value a business and its underlying assets. 	tor deduct capital expenditures; interest on borrowings net of capitalized interest; and cash income taxes.	Cash provided by operating activities
Adjusted net debt	 To conduct valuation-related analysis and make decision about capital structure. We believe this helps investors and analysts analyze ou enterprise and equity value and assess our leverage. 	s Total long-term debt add (deduct) current portion of long-term debt; deferred transaction costs and discounts; net debt derivative (assets) liabilities; credit risk adjustment related to net debt derivatives; current portion of lease liabilities; lease liabilities; bank advances (cash and cash equivalents); and short-term borrowings.	Long-term debt
Debt leverage ratio	 To conduct valuation-related analysis and make decisior about capital structure. We believe this helps investors and analysts analyze ou enterprise and equity value and assess our leverage. 	divided by	Long-term debt divided by net income
